Authors' Response to Reviewer 1

General Comments. The manuscript studies an interesting placeholder problem and is generally well written. Some methodological details need clarification before it can be accepted.

Response: We sincerely thank the reviewer for the time and effort invested in reviewing our manuscript, and for the thoughtful and constructive feedback, which has helped us to improve the quality of the paper considerably. We have carefully considered all comments and suggestions, and we address each of them point by point below.

Comment R1.1

The data collection procedure is not described in sufficient detail.

Response: We thank the reviewer for this valuable suggestion.

We have expanded Section 2 with a full description of the data collection procedure, including the sampling interval and the cleaning steps.

Comment R1.2

Figure 3 is difficult to read.

Response: We thank the reviewer for this helpful remark on readability.

Figure 3 has been redrawn with larger labels and a colour-blind-friendly palette.

Comment R1.3

There is a typo in Equation (4).

Response: Corrected.
