Response to Reviewers' Comments

# An Imaginary Benchmark for Sample Algorithms

Revised manuscript submitted to

*IEEE Transactions on Intelligent Transportation Systems*

Manuscript No. T-ITS-00-00-0003

Richard Roe

November 2, 2026

## Authors' Response to Reviewer 1

**General Comments.** A solid contribution. A few clarifications are needed.

**Response:** We sincerely thank the reviewer for the time and effort invested in reviewing our manuscript, and for the thoughtful and constructive feedback, which has helped us to improve the quality of the paper considerably. We have carefully considered all comments and suggestions, and we address each of them point by point below.

**Comment 1**

Please report the runtime of each algorithm.

**Response:** Runtimes are now reported in Table 4.

**Comment 2**

Please add a reference to the original benchmark.

**Response:** The reference has been added in Section 1.

> **Revised text (Section 1, p. 2)**
>
> The benchmark was first introduced by Doe et al. (2000) ~~an earlier study~~.

## Authors' Response to Reviewer 2

**Comment 1**

Is the benchmark publicly available?

**Response:** Yes. As noted in our response to Reviewer 1, Comment 1, all data and code are now linked in the Data Availability Statement.
